► LBT range for waste water treatment

UV-C WATER TREATMENT

SANIPRO keeps diversifying its activities in the hygienic industry.

SANIPRO is setting up a revolutionary and reliable water treatment:

ULTRA-VIOLETS RAYS STERILIZATION

This new innovative system will make possible the legionella prevention on hot water and purification of micro-organisms which can be found in the water such as viruses or bacteria without the use of chemical products. This new system eradicates bacteria, virus, spore and legionella from water.

In few words, it means:

- Safety;
- Environmental friendly;
- Savings:

Applications

- home
- waste water treatment
- public swimming pools
- private swimming pools
- spa
- legionella prevention
- aquariums
- fish farm
- salt water
- hospitals
- pharmaceutic industry
- food industry
- cosmetic industry
- laboratory
- snow guns
- nuclear centrals
- boat & desalinization plants.

UV-C SURFACE TREATMENT

UV-C SURFACE TREATMENT

DISINFECTION
with **ULTRA-VIOLETS**

► SANIPRO UV Tunnel for the sterilization of surfaces

The disinfection of the packaging before the use is very important specially in the Pharmaceutical and Food Industry.

SANIPRO is very glad to introduce a system that is able to sterilize surfaces as bottles, food packs and little containers, without the use of chemical products. Thanks to the **UV Rays** capacity to destroy viruses and bacteria, this innovative system will make possible a complete sterilization of whatever surface.

Applications

- little containers for Laboratory analysis;
- bottles and cup;
- blisters;
- conveyors for the transport of food before the packaging;
- raw materials;
- pharmaceutic industry;
- laboratory;
- food industry;
- cosmetic industry.

UV-C AIR TREATMENT

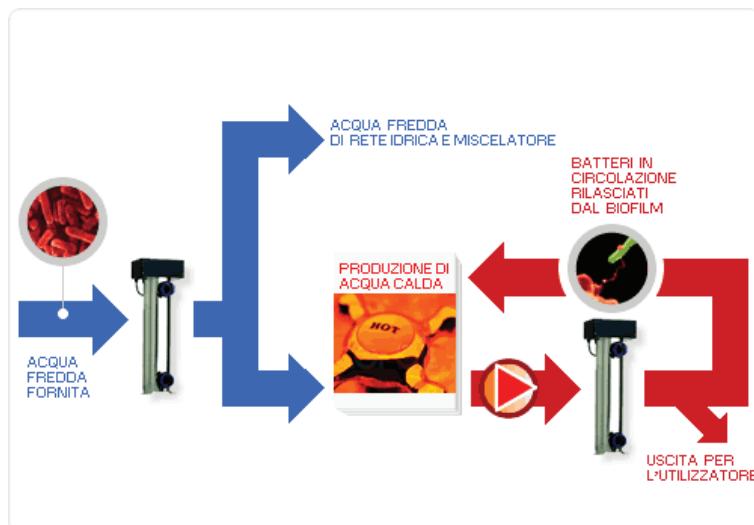

UV-C AIR TREATMENT

Air is one of the main vehicle of viruses and bacteria. This is the reason why, sterilization of conditioned air inside public place is very important in order to prevent the diffusion of deseases.

SANIPRO is very glad to present a rapid and effective solution:

- ▶ Legionella prevention inside cooling towers

UV AIR TREATMENT

Applications

- air disinfection by UV Rays inside hospital rooms and ambulances in order to prevent the diffusion of the disease;
- air ducts inside hospitals and other public place;
- Cooling towers.
